ABOUT PUMP REPAIRING

When placing a new leather on a

RED JACKET SO-EASY-TO-FIX

the valves are easily removed through the base of the pump as the illustrations show. The cost is little more than the price of the repair. You can do it. The only tool needed is a monkey wrench.

Compare this with the time, trouble and expense of removing ordinary pumps from the well, to make the same repair. You see it's not the cost of the leather but the cost of putting it on.

This and other economical features of 'So Easy-To-Fix' pumps will be explained at your request.
